

BIO PLANTELLA YELLOW ADHESIVE PLATES / BUTTERFLIES

Excellent mechanical protection of indoor and balcony plants against a wide range of plant pests in the form of a butterfly.

UNIQUE ADVANTAGES:

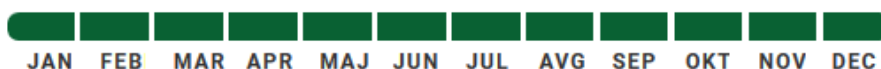

- Simple use with special pointy form to stick into the soil.
- Long-lasting effect because of the high resistance to temperature and moisture changes.

ADVANTAGES:

- Completely natural control of aphids, Thrips spp. and Greenhouse whitefly and other plant pests.
- High-quality entomologic adhesive that enables quick adhesion of all pests (including the light ones) does not wash away and does not dissolve.
- Adjusted size for smaller plants.

USAGE:

COMPOSITION:

Plates covered with the transparent adhesive (polyisobutylene), no added active chemical substances for plant protection.

DESCRIPTION:

Adhesive plates have a carefully chosen shade of yellow that strongly attracts numerous plant pests, such as leaf lice, greenhouse whiteflies and thrips. Once the pests approach the plate they become stuck on the fast active entomological adhesive layer. Adhesive plates are prepared in the form of a butterfly.

DIRECTIONS FOR USE:

For effective plant protection place 2 - 4 plates in a plant pot or planter. When the adhesive layer gets excessively covered with pests replace the plate with a new one.

IDENT / Packing:

- 40350 / 10 pcs – 40 pcs / box, 75 boxes / pallet

TESTED EFFICACY:

Our products are the result of years of knowledge, proven research and technological innovation. Their efficacy has been tested and validated in scientific laboratories.
