### Depth Gauge Bead 6 mm, galvanized

Ú[ ~Á @abé } &A^Z} Á Á {

Provide a quick and accurate means of ensuring consistent, minimum plaster depths as plaster is simply 'ruled off' to leave the required thickness. Made of punched and galvanized steel, they are used to create a smooth finish for example before tiling and are available for different plaster thicknesses.

Should the plaster and beads be exposed to constant high moisture or damp after installation in e.g. wet rooms, swimming pools or bathrooms, it is advisable to use corrosion free material such as stainless steel.

#### Technical Data:

Galvanized steel products are manufactured according to BS EN 10346:2009-DX51+Z275 and EN 13658-1:2005 and have a double sided zinc coating of at least 275g/m<sup>2</sup>.

#### Bead Measurements:

21 / 6 mm
