*feel*Ness
sense of touch

To create visually striking interiors, we played with light and reflection, and created a new line of matt and gloss boards, named Feelness. The new boards can bring in elegance and exclusivity to any project, while offering a great haptic experience. Their tactile finish defines the feel of the space and stands out from other furniture surfaces. Glossy or Matt, it's a personal choice and each has its own beauty and advantages.

PET Laminated MDF

PET Laminated MDF is a high-quality MDF board covered with matt or gloss PET foil. The decor range includes our top-selling uni colors and it is 100% coordinated with the Kronodesign collection. The front and back sides of the boards are produced in the same color.

The hot melt Polyurethane adhesive technology guarantees excellent bonding and ensures flat surface with moisture protection. All 10 matt and gloss designs are available on stock.

HPL Bonded MDF

HPL Bonded MDF is a composite Moisture resistant MDF board covered with an HPL sheet.

The top surface is with a velvety texture and a luxurious soft-touch tactile effect. It has an anti-fingerprint finish (AF) and the bond is secured by the hot melt Polyurethane adhesive technology.

The front and back sides of the boards are produced in the same color. All 12 designs are available on stock.

The depth, the elegance, the functionality of the matt finish is embraced by designers and architects - it gives colors a warm and inviting look.

Feelness Ultra Matt is an MDF covered with decorative Ultra Matt PET foil on the front side and grainy textured identical color PP foil on the reverse.

The high surface strength is secured by an additional PE protective film on the front side of the board, which should be removed only after the furniture has been assembled.

The surface can be kept clean and looking great by using non-abrasive cleaning agents designed for plastic surfaces.

PET Laminated MDF boards can be formatted on all conventional saws and can be edged on all standard edging lines.

The High Gloss can make an interior feel really glam, its shiny and light reflecting surface immediately makes a statement. High Gloss finishes provide a modern, yet chic look.

Feelness High Gloss is an MDF covered with decorative High Gloss PET foil on the front side and grainy textured identical color PP foil on the reverse. The high surface strength is secured by an additional PE protective film on the front side of the board, which should be removed only after the furniture has been assembled. It stands up exceptionally well to scrubbing and regular cleaning by using non-abrasive cleaning agents designed for plastic surfaces. PET Laminated MDF boards can be formatted on all conventional saws and can be edged on all standard edging lines.

Feelness Invisible Touch boards feature an attractive and aesthetic appearance. They have a high resistance to impact, scratch and surface abrasion. Feelness Invisible Touch boards do not corrode, have good dimensional stability and are resistant to moisture, heat, cold and stains.

Feelness Invisible Touch consists of a moisture resistant MDF board bonded with Invisible Touch HPL on the front side and same color Standard HPL on the reverse. It's a high scratch and impact resistant product suitable for areas subject to high hygiene requirements. The special anti-fingerprint property prevents unsightly fingerprints on the surfaces and reduces the amount of cleaning required.

Velvety texture with a luxurious soft-touch tactile effect and an anti-fingerprint finish.

Storage Instructions

The boards should be stored in a dry, clean and roofed placing.
 The material should be acclimatized 72 hours prior to use at room.
 It is recommended to store in the original Kronospan packaging, on pallets.
 The protective foil should be removed immediately after assembly.
 The boards should be stored without extra load on the flat surface.

Cleaning Instructions

To remove stains caused by substances such as coffee, tea, oil or wine we recommend the use of clean water, a damp cloth or mild detergent cleaner like dish washing liquid. Dilutions of all sorts of commercially available cleaners for plastic surfaces consisting of ionic or non-ionic detergents are acceptable. After cleaning, the surface acceptable to be rinsed with clean water and dried with a soft cloth.

Not recommended: abrasive cleaning materials and accessories such as sponges with an abrasive surface, abrasive cleaners and cleaning polishes, concentrated acids. Using any of these are not recommended as they can cause irreversible damage to the surface and its properties.
