- short fiber length and geometry reduces potential expansion
- each fiber is encapsulated with a special binder that prevents it from absorbing water
- micro-expansion on the edges seals the connection between planks

*1 Consists of natural wood and an organic chemical binder

*2 Tested germs: Staphylococcus aureus

*3 Selected decors

*4 24 h surface water protection as stipulated by NALFA (North American Laminate Floor Association) with additional 100 h+ surface water protection according to works standard specification KRONOSPAN WN-101, www.100hour-test.com

*5 May contain traces of PVC from f.e. packaging

*6 O.R.C.A. boards are CO₂ neutral, because the production process of transforming a tree into O.R.C.A. emits less CO₂ than the tree itself has stored.
