

## Intersections

Version: 09/08/2022

All DreamClick products start with the same base, the RCB board. The difference in height is defined by the thickness of the decor layer, the wearlayer and the lacquer. The profile animation visualizes how the different layers affect the height.

### Live

**Total thickness: 3.8 mm**

- 1. Protective PU lacquer
- 2. Wear layer 0.30mm
- 3. Decor layer
- 4. Rigid Composite board (RCB)

### Composition RCB
