

Effect Insecticide against Wasps and Hornets

Effect[®]

Active ingredients:

- Permethrin 0,5%
- Tetramethrin 0,2%
- PBO 1,2 %

Formulation:

- Aerosol

The insecticide with instant insect eradication and a long-lasting effect offers effective protection against Wasps and Hornets.

Effect Aerosol against Wasps and Hornets is a contact spray insecticide with proven efficiency, designed for insect control of wasps and and hornets. The special double active ingredient formula, based on Permethrin and tetramethrin, instantly eradicates the annoying insects and provides an extended effect i.e. a long-lasting repellent action to keep the stinging pests away for a long time. The added PBO is a synergist that improves the formula efficiency.

Advantages:

- Safe spraying- from a distance of 4-6 meters
- Instantly effective
- Special repellent keeps insects away from the treated area
- Added PBO for increased effectiveness
- Combination of two active insecticidal ingredients providing an instant and a long-lasting effect

Directions for use:

Spray from safe distance (4-6 meters) for 5 seconds.

Packaging:

400 ml, 24 pieces per packet, 1440 pieces per pallet
750 ml, 12 pieces per packet, 768 pieces per pallet
