# Quick Clac New generation

COMMERCIALISED  
FOR OVER  
**10 YEARS**

-  — New plug
-  — More resistant
-  — Quicker

**WIRQUIN Plastiques** - 11 rue du Château de Bel Air - 44477 Carquefou cedex FRANCE  
Web site : [www.wirquin.com](http://www.wirquin.com)

## The keys to success

**Easy to use :** it opens and closes simply by pressing the plug with your foot or your hand.

**Easy to install :** no cable, no pull chain, no plastic plug!

**Easy to maintain :** all the wear and tear parts remain accessible.

**Easy to clean.**

## The new generation

### A revamped plug !

- A larger plug that covers more of the waste : the diameter goes from 61 to 65 mm.
- A new domed plug, with a more contemporary design.
- The sticker is replaced by a "PUSH-Wirquin" laser marking.

### The product is more resistant !

- The new Quick Clac resists to over **50 000** openings/closings. The equivalent to 35 years of use for a family of four.

### A quicker flow !

	Quick Clac New generation	Test conditions (height of water)
Washbasin (with trap)	0,75 L/s	in 120 mm
Bath (with trap)	0,80 L/s	in 300 mm

### A plug that is easier to open and close !

- The effort needed drops from 47 newtons to 33 at opening and 40 at closing.

### A faster and easier installation !

- The plug clips into the waste; it no longer needs to be screwed in, hence it is time saving.

### Reduced maintenance !

- The new plug fits into the existing waste which enables replacement of products already installed.
- The same plug is used for either washbasin or bath wastes.
- Without tools and without dismantling of other parts, the plug can be replaced in less than 10 seconds and the plug washer in less than 20 seconds.

## The new packaging :

**New plug**  
Better looking, more resistant, more effective!

**New overflow over**  
Wider, more domed-shaped,  
better looking !  
(Available in chromed, white or golden ABS)

"Press once...  
it opens! Quick!"

"Press again...  
it closes! Clac!"

(Stainless steel, white or chromed brass)
