## PROFIL DE TRECERE

CU DIFERENȚĂ DE NIVEL

## CONNECTING PROFILE

FOR DIFFERENT-LEVEL FLOORS

## ANPASSUNGSPROFIL

FÜR UNTERSCHIEDLISCHE BODENHÖHEN

0,93 m, 2,7 m

10 buc/pcs/stück

**RO** Aceste profile se folosesc pentru a face trecerea între suprafete cu diferență de nivel. Au rolul de a acoperi rostul dintre diferite materiale de finisare (mochetă / parchet / gresie etc.) și de a compensa diferența de nivel, astfel contribuind și la scăderea riscului de accidentare. Se montează cu diblu și șurub.

**EN** Aluminium connecting profiles for different-level floors are used to connect floorings with a difference in level. They have the role to cover the connection between different finishing materials (carpet / parquet / tiles etc.) and to compensate for the level difference, thus also contributing to the reduction of the risk of accidents.

**DE** Diese Profile werden verwendet, um den Übergang zwischen Belägen mit unterschiedlichen Höhen zu gewährleisten. Sie haben die Aufgabe, die Fuge zwischen den verschiedenen Belagmaterialien (Teppich / Parkett / Fliesen usw.) abzudecken und den Höhenunterschied auszugleichen, was zur Verringerung der Verletzungsgefahr beiträgt.
