

## PRODUCT INFORMATION SHEET

### Mobile box

#### Product description

2-part, modular, mobile tool box. Two separate, roomy modules with a removable carrier enable the storage and transport of up to 30 kg of tools in an organized manner. On the other hand, the compact dimensions and the possibility of disassembling the modules, allow it to be transported by car and delivered almost directly to the workplace. Ideal for service companies, car repair shops, as well as for the garage of any DIY enthusiast. An ideal solution for professionals who value mobility, security and flexibility.

#### Characteristics

- body made of a reinforced polymer blend;
- 2 large castors built in the lower module enable quick and convenient transport of the trolley to the workplace;
- rubber coated castors reduce noise while driving and increase traction;
- built-in, foldable handle, made of ABS;
- a solid gasket in the top cover ensures dust-tightness and resistance to splashing with water, protecting the contents of the box even in difficult working conditions or unfavourable weather conditions;
- durable fasteners made of ABS;
- functional inner tray allows carrying small tools and elements anywhere;
- small size and weight;
- 2 segments – each segment can be used independently:
  - the upper, closed box is equipped with a removable tray, the cover has 2 organizers with a transparent cover for storing small parts and accessories, each with removable compartments
  - the lower box is equipped with built-in castors and is the basis of the entire mobile box, it can be used as a handy tool container.
