

Evo Gloss

High Gloss Pvc Panel

MDF pentru amenajări de efect

Panourile EvoGloss din MDF sunt potrivite pentru un interior cu aspect modern hi-tech. Este un produs de neegalat, ce oferă ambientului un aspect modern.

EvoGloss este fabricat din plăci de MDF durabil și acoperite cu folie PVC, de 0.3 mm grosime. Aceasta le conferă suprafața lucioasă și culoarea intensă precum și rezistența la pătare și zgârieturi.

Plăcile de Evogloss sunt disponibile la dimensiunea standard de 2800 x 1220 mm, cu grosimea de 18 mm.

Acest catalog conține gama de decoruri EvoGloss comercializate în România ca program de stoc permanent, cu o varietate de culori și printuri pentru a satisface orice gust.

Colecția EvoGloss cuprinde 50 de decoruri din categoriile uni, lemn, fantezie și hologram. Finisajul acestora este în preponderență ultralucios, dar există și câteva decoruri mate (soft touch).

Panourile EvoGloss reprezintă un adevărat alfabet creativ, care permite exprimarea celor mai bune idei de design.
