

Tap & Go locking system structure

TAP&GO® Structure

The UP HOOK

Droploc click on the short side for UP-HOOK

The LOW HOOK

Droploc click on the short side for LOW-HOOK

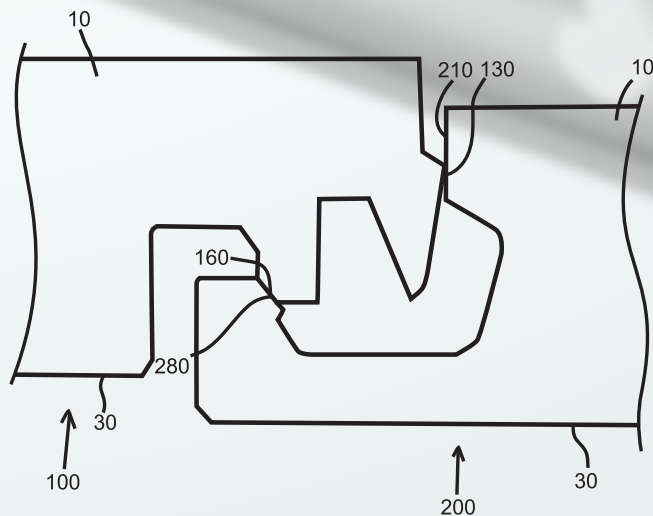

4-side lock: The elasticity groove design is applied in both long and short end sides. TAP&GO's special 4 sides' Locking technology ensures the installed floors hard to dispart after installation while other locking floorings are easily apart from short ends.

Drop lock structure is also provided for more option to the customer with less tap, especially the DIY home users who has less experience of installation. The combination of the drop lock short side with the original strong long side still gives perfect performance on the final installation effect.

3R TAP & GO LOCKING SYSTEM

Tap&Go[®]

**Successfully Granted Patent in China,
South Africa , Russia , Australia,
USA and Canada.**
