

Tap&Go® Locking System Flooring

Save more, live better

TAP&GO® Raises Worldwide Flooring Quality Standards

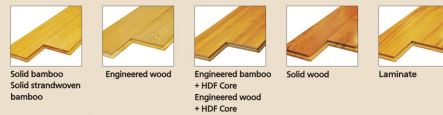

Patented Technology, Stronger Material and Precision Manufacturing Enhance Value to Distributors and End-Users

TAP&GO® Innovative Glueless Locking Technology Flooring

Thank you for choosing TAP & GO flooring. Each kind of flooring has its own specific installation instruction. The success installation of your flooring depends on the following guidelines. Read and follow the instructions, you will enjoy your quality floor that last for years.

TAP&GO® Application

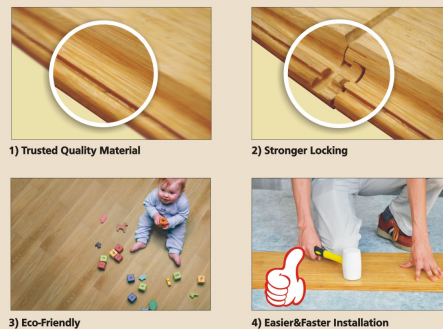

TAP&GO® Structure

4-side lock: The elasticity groove design is applied in both long and short end sides. TAP&GO's special 4 sides' Locking technology ensures the installed floors hard to dispart after installation while other locking floorings are easily apart from short ends.

Drop lock structure is also provided for more option to the customer with less tap, especially the DIY home users who has less experience of installation. The combination of the drop lock short side with the original strong long side still gives perfect performance on the final installation effect.
