# Corospin 513

Tile clip

Tile clip made of stainless steel for cut tiles. It enables fast and stable fixing of the tiles to the roof battens.

Advantages

✓   protects tiles against slipping out
✓   an easy and stable ridge tile fixing
✓   protects againts unfavourable wind influence

Application

✓   for the fixing of roofing clips and cut tiles in baskets and corners

Characteristics

Material	stainless steel
Colour	steel
Wire size	0,8 mm
Wire length	400 mm

Dimensions of the plate	17x19x23 mm
Clamping plate thickness	≥1,0 mm
Mechanical strength	≥ 0,15 kN

The product has passed a positive assessment of its performance for the intended use: fixing of roofing elements. Confirmation document: National Technical Assessment No. ITB-KOT-2020/1307 edition 1.

Installation

1. Tiles should be placed on battens.
2. The lath on the underside of the tile is covered with a clamp so that the hooks on the wire are pointing towards the tile to be fixed.

Storage

The product should be stored in dry and covered areas, protected from deformation. Transport in covered means of transport, adequately protecting against damage.

Packaging

Quantity per box (pcs.):	25
Quantity on a pallet (pcs):	20000
